SMI-SPON
ABSORBABLE GELATIN SPONGE

What is SMI-SPON

SMI-SPON is a surgical haemostatic sponge, manufactured from highly purified first grade gelatin material for use in various surgical procedures.
It is a quick and effective haemostatic which stops bleeding fast.
It reduces intraopertive bleeding and surgery time.

Why using SMI-SPON

SMI-SPON can be used in various surgeries for haemostasis. When applied in vivo and used in appropriate amounts, it is completely absorbed within 3-4 weeks. SMI-SPON is biocompatible, non-toxic and non-pyrogenic.
SMI-SPON is gamma sterilized and individually packed in ready to use blister packaging.

Where to use

- ☑ Dental surgery
- ☑ Plastic surgery
- ☑ Vascular surgery
- ☑ Orthopaedic surgery
- ☑ ENT surgery
- ☑ Neuro surgery
- ☑ Abdominal surgery
- ☑ Anorectal surgery
- ☑ Genito Urinary surgery
- ☑ Gynaecological surgery

How to use SMI-SPON

- ☑ Cut a piece to the desired size
- ☑ Apply SMI-SPON either in a dry state or saturated with physiological salt solution
- ☑ If used dry, a piece of SMI-SPON is applied to the bleeding place and held in place with moderate pressure until hemostasis results
- ☑ If used wet, first immerse in the solution and then withdraw, squeeze between gloved fingers to expel air bubbles, and the replace in saline until needed
